c. *spec.* Dissatisfied with and outspoken against the prevailing state of affairs, current beliefs, etc.; esp. in phr. *angry young man* (abbrev. A.Y.M.).

The expression 'angry young man' and variants of it became commonly used, esp. by journalists, after the production of J. Osborne's play *Look Back in Anger* (first

performed 1956). The phrase did not occur in the play but was applied to Osborne by G. Fearon, a press reporter (see quot. 2 Oct. 1957), thence used particularly of young writers, usually of provincial and lower middle-class or working-class origin, who denounced or satirized the 'Establishment' (q.v.) and the abuses of the time; later applied by extension to any person, group, etc., in Britain and elsewhere who considered the times to be out of joint. For the formation, cf. 'bright young thing' (BRIGHT *a.* 7b).

anhedral (æn'hi:drəl, -'hɛdrəl), *a.* [f. AN- 10 + HEDRAL *a.*] Applied to crystals that are not bounded by plane faces; also called ALLOTRIOMORPHIC, *xenomorphic.* So **an'hedron**, a crystal of this kind.

1896 L. V. PIRSSON in *Amer. Geologist* XVII. 94 Since the term *crystal*, when strictly used, means a body possessing not only a certain internal molecular structure, with definite physical properties, but more especially an outward symmetrical form with plane faces, it is evident that there is no good term for the rounded or formless masses in which minerals occur in rocks. Therefore, after consultation with Prof. E. S. Dana, the term *anhedron* (meaning without planes) is proposed for these formless masses which possess the internal structure of crystals; and such minerals may also be spoken of as having an anhedral development. **1898** *Amer. Jrnl. Sci.* V. 361 The rock..shows numerous tabular phenocrysts..and a few anhedra of augite. **1913** G. A. J. COLE *Outl. CHALLINOR *Dict. B. *adj.* [In its introduction distinct from ANIMAL *sb.*, and = Fr. *animal*, ad. L. *animāl-is*; but mixed up with attributive uses of the sb., so as now to be hardly separable as a whole. As L. *animālis* was treated sometimes as a deriv. of *anima*, sometimes of *animus*, the mediæval use of *animālis* varied from 'bestial' to 'spiritual,' and Eng. *animal* adj. had a similar wide range. Mod. usage connects it with the sb. *animal*, and not with *anima* or *animus*.]

†1. Connected with sensation, innervation, or will; sometimes = psychical. 5. Of or pertaining to animals, as opposed to vegetables. (Not separable from the sb. used *attrib.*) Cf. *animal pole* below and VEGETATIVE *a.* 1 d.)

This fact..led to the designation of the two poles as *animal* and *vegetative*.

anion ('ænaɪən). *Electr.* [a. Gr. *ἀνιόν* (a thing) going up, neut. of pr. pple of *ἀνι-έναι* to go up, f. *ἀνά* up + *ἰ-* go.] An ion carrying a negative charge which moves towards the anode (positive electrode) during electrolysis. Opposed to *cation*. Hence **anion exchange**, ion exchange involving anions; also *attrib.*; so **anion exchanger**, a substance capable of anion exchange. Also **anion-active** *a.*, having an active anion.

1834 W. WHEWELL *Let.* 5 May in I. Todhunter *W. Whewell* (1876) II. 182 If you take *anode* and *cathode*, I would propose for the two elements resulting from *electrolysis* the terms *anion* and *cation*,..and for the two together you might use the term *ions*. **1834** FARADAY *Res. Electr.* (1849) I. 198, I propose to distinguish such bodies by calling those anions which go to the anode of the decomposing body. **1870** FERGUSON *Electr.* 162 In acids, hydrogen forms the cation, and the acid radical the other constituent, the anion. **1931** S. MATTSON in *Soil Science* XXXI. 325 Cation exchange predominates at high pH values whereas anion exchange predominates at low pH values. **1941** *Industr. & Engin. Chem.* XXXIII. 1271/2 The high-capacity anion-exchange resin was Amberlite IR-4. *Ibid.*, Table I indicates that a practical equilibrium adsorption value is attained with both anion-exchangers after 6-hour contact with either hydrochloric or sulfuric acid. **1946** *Nature* 26 Oct. 585/2 It is well known that the addition of divalent metallic ions greatly enhances the surface-active properties of anion-active detergents. **1963** A. J. HALL *Textile Sci.* vi. 296 Surface active agents or surfactants can be usefully classified into three main groups —*anion-active*, *non-ionic*, and *cation-active*. *Ibid.* 297 All the above surface active types are *anion-active*, that is, the effective hydrophobic component is present in the anion when the substance is dissolved in water and ionises into anions and cations.

Hence **ani'onic** *adj.*, (*a*) of or pertaining to anions; (*b*) = *anion-active*.

These are almost all in the field of inorganic chemistry. The term 'anionic exchanger' is often applied, however, to materials which absorb acid molecules from aqueous solution. **1950** *Thorpe's Dict. Appl. Chem.* X. 800/1 The anion is the active part of the molecule, hence the term anionic agents. The best detergents are in this class. **1962** *Lancet* 26 May 1109/2 The drug slowly exchanges with cations (or anions in the case of anionic drugs) in the lumen of the alimentary tract and is then free to be absorbed.

Chem.* v. 203 [Lapworth] likened all reagents either to anions or to cations: an 'anionoid' reagent was one which behaved analogously to an anion, or, as Robinson subsequently expressed it, to an 'active' anion; and a 'cationoid' reagent was one which behaved like a cation, or an active cation. **1958** PACKER & VAUGHAN *Org. ant-, *pref.*, short f. ANTI- 'against,' before vowels, and *h*-; in words already in Gr. as *ἀνταγωνιστής* antagonist, and occas. in mod. words, as *ant-acid* (less commonly *anti-acid*).

-ant¹, *suffix*, a. Fr. *-ant*, sometimes:—L. *-entem, -āntem, -ēntem*, ending of pres. pple. (see -ENT); sometimes a later adaptation of *-āntem* only. All the participial forms were in OFr. levelled under *-ant*, the sole ending of the pr. pple., as L. *amānt-, vidēnt-, sedēnt-, crēdent-em* in Fr.

amant, *voyant*, *séant*, *croyant*. But other words were subsequently adopted in their L. stem form, as *prudent*, *présent*, *élégant*. Hence Fr. words in *-ant* are of two kinds, one answering to L. *-ānt*, the other to L. *-ent*, *-ēnt*. All were adopted, in their actual Fr. forms, in Eng., where they subseq. became *-'aunt*; then again, with the change of stress, *-ant*, as L. *affīdent-em*, *diffī-dent-em*, *plicānt-em*, *servient-em*, *tenēnt-em*, OFr. *afiant*, *defiant*, *pliant*, *serjeant*, *tenant*, ME. *afi'a(u)nt*, *defi'a(u)nt*, *pli'a(u)nt*, *serje'aunt*, *te'naunt*. Most of them retain *-ant*, e.g. *claimant*, *pleasant*, *poursuivant*, *servant*, *suppliant*, *valiant*; but since 1500 some have been refashioned with *-ent* after L., wholly (as *apparaunt*, *-ent*), or partly (as in *pendant*, *-ent*, *dependant*, *-ent*, *ascendant*, *-ent*). Hence, inconsistency and uncertainty in the present spelling of many words, in which L. and Fr. analogies are at variance: see -ENT. Many new words of this class have been adopted from L. *-āntem* directly or through later Fr., or have been formed on L. analogies, or adopted from mod.Fr. and Romance *-ant*, *-ante*; as *concomitant*, *protestant*, *commandant*, *anæsthesiant*. For sense, see -ENT.

-ant[2], for -AND[1], an assimilation of the northern Eng. to the Fr. form of the pres. pple., as in *allwealdant*, *-ent*. More commonly the converse took place, the native *-and* being substituted by northern writers for *-ant*, as in *aboundand*, *sembland*.

-ant[3], a corruption of *-an* from various sources, due to confusion and assimilation of final *-an*, *-and*, *-ant*, as in *pagean(t*, *peasan(t*, *pheasan(t*, *truan(t*, *tyran(t*. Cf. *gyane*, *gyand*, obs. forms of *giant*.

‖**anta** ('æntə). *Arch.* Commonly in pl. antæ. [L. *antæ* (no sing.), perh. f. *ante* before. Cf. ANTES.] A square pilaster on either side of a door, or at the corner of a building.

ante, obs. form of ANT and AUNT.

ante-, L. *prep.* and *adv.*, used in composition with vbs., as *antecēdere* to go before; vbl. sbs., as *antecēssor* a foregoer; other sbs. and adjs. derived from phrases, as *antecēnium* (from *ante cēnam*), *antetemplum*, *antemeridiānus* (f. *ante meridiem*), *antepænultimus* (f. *ante pænultimum*). Examples of all these have been adopted in Eng. directly or through Fr., and have, since 1600, served as models for the formation of others, especially of the last class, from which, as in *ante-temple*, *ante-nuptial*, *ante-* has acquired a separable character, and is prefixed to other words, as *ante-room*, *ante-Cuvierian*, *ante-date*. Adjectives of this type are formed at will, either with or without adj. endings, as *ante-baptismal*, *ante-Norman*, *ante-reformational*; and *ante-communion*, *ante-reformation*, *ante-war*. The latter are really attributive *phrases*, similar to the native *after-dinner* oration, *before-breakfast* lesson, *out-of-doors* employment, *up-stairs* room. The former, though formally compounds of *ante* + *adjective*, are in sense adj. formations on a phrase, as *ante-mundane*, logically (*antemund*)*um* + *ane*; cf. (*old-woman*)*ish*. Some of the more obvious of these combinations of *ante-* are grouped together here, as not needing separate treatment.

In full *Ante-Communion Service* [ANTE- B. 2], a popular term for that part of the Communion Service in the Book of Common Prayer which extends from the beginning of the office to 'the end of the general Prayer "For the whole state of Christ's Church militant here in earth"' and is appointed to be said 'upon the Sundays and other Holy-days (if there be no Communion)'.

According to the American rite, the Ante-Communion ends with the Gospel.

1827 *Gentl. Mag.* XCVII. II. 487 There was no offertory, and no prayer for the church militant. I am not aware by what authority this part of the Ante-Communion Service is now so commonly omitted on Sundays. **1871** F. G. LEE *Dict. antelope ('æntɪləʊp). Forms: 5–7 antelop, 5 antyllope, antlop(e, 6 anteloppe, 7 antalope, 6–9 antilope, 5– antelope. [a. OFr. *antelop* (also *antelu*), ad. The popular and literary name for the numerous species of the deer-like ruminant genus *Antilope* (Pallas), the limits of which have been variously extended or contracted by different zoologists. The most usual scientific characteristics of the genus are cylindrical, annulated horns, and the possession of a sub-orbital or 'lachrymal' sinus. They are sometimes grouped as *True* Antelopes, *Bush* A., *Capriform* or Goat-like A., and *Bovine* or Ox-like A. It is with the first of these, distinguished by extreme grace and speed of motion, that the name is now popularly associated.

This application of the word is recent. The Gr., L., and OFr. (*Trésor* of Brun. Lat.) notices describe a creature haunting the banks of the Euphrates, very savage, hard to catch, having long saw-like horns, with which they cut in pieces and broke all 'engines,' and even cut down trees. With these attributes the 'antelope' early became a heraldic animal. The modern denotation seems to begin with Topsell. The genus *Antilope* was constituted by Pallas *c* 1775.

antenna (æn'tɛnə). *Pl.* **-æ**, rarely **-as**. [a. L. *antenna*, in ancient use 'a sail-yard'; usually referred to Gr. *ἀνατείν-ειν* to stretch out or forth. As the projecting 'horns' or ends of sail-yards, in L. *cornua antennārum*, were also called *κεραῖαι*, *antennæ* was aptly employed to render the same word when meaning the horns of insects, which indeed often suggest the *cornua* of the long ascending *antennæ* or yards of lateen sails. Common in Lat. entomol. works during 16–17th c., but not found in the dict. of any mod. lang. bef. 1700.]

anti, erron. var. ANTE *sb.*^{2}, *v.*

anti-, *prefix*^{1}; repr. Gr. *ἀντι-*, *ἀντ-*, *ἀνθ-* (see ANT-, ANTH-), 'opposite, against, in exchange, instead, representing, rivalling, simulating'; in Gr. combined *adverbially* with (1) *verbs*, as *ἀντιλέγειν* to speak against, contradict; (2) *vbl. adjs.*, as *ἀντίλογος* speaking against, contradictory, *ἀντίλεκτος* spoken against, disputed; (3) *vbl. sbs.* and *abstracts* from *vbl. adjs.*, as *ἀντίλεξις* speaking against, contradiction, *ἀντιλογία* contradictoriness, disputation; (4) other *sbs.*, forming *adjs.* and *sbs.*, as *ἀντίβιος* using force (*βία*) on the opposite side, *ἀντιστράτηγος* the general on the opposite side, the enemy's general; passing into the sense of 'counterfeit, false,' as *ἀντίκλεις* a key rivalling or simulating the true one, a counterfeit key. Less commonly combined *prepositionally* with *sbs.* in (5) *synthetic adjs.* as *ἀντίθυρος* opposite the door (from *ἀντὶ θύρας*), *ἀντίθεος* rivalling the gods (*ἀντὶ θεῶν*), *ἀντίχριστος* opposed to Christ, an opponent of Christ.

In English, used A. in compounds already formed in Greek, or others modelled on them. Also B. as a living formative, I. in words analogous to 4 above, as *anti-pope*, *anti-king*, *anti-climax*; II. mainly, in synthetic combinations, in which *anti-* governs a sb. expressed, or implied in its appropriate adj., as *anti-Jesuit*, *anti-English*, *anti-slavery*, *anti-friction*; III. in the derivatives of these, as *anti-royalist*, *anti-supernatural-ism*. The analogy for all these seems to have been given by *antichrist* and its adj. *antichristian*, which (with the analogous *antipope*) were almost the only examples in use bef. 1600. Shakspere has no *anti-* combinations.

A. *Derivatives.* Words in which *anti-* adverbially qualifies the vb. in vbl. sbs. or adjs., and their derivatives, in compounds already formed in Gr., as ANTILOGISM, ANTINOMY, ANTIPHONIC, ANTIPHONY, ANTITHESIS, ANTITHETIC, and mod. compounds modelled after them as ANTITROPOUS. All these appear in their alphabetic places hereafter.

B. *Combinations.*

c. Many of these, like the simple adjectives, are also used as substantives, forming (1) party-names as *anti-christian*, *anti-Arminian*, *anti-Catholic*, *anti-radical* (see 5); (2) names of material agents as *anti-corrosive*, *-perspirant*, and esp. medical terms as *anti-bacterial*, *-depressant*, *-diuretic*, *-malarial*, *-narcotic*, *-pyretic*, *-stimulant*. Also ANTIBIOTIC, -COAGULANT, -CONVULSANT, -OXIDANT, -PRURITIC.

d. *Advbs.* in *-ly* are formed on these adjs., when required: as *anticalvinistically*, *anticonstitutionally*.

1674 HICKMAN *Hist. Quinquart.* 202 (ed. 2) [One who] preached Anticalvinistically in all the five Points under Controversie. *Mod.* They would act unconstitutionally, indeed altogether anticonstitutionally, in exluding a member personally disliked.

4. Attributive phrases, consisting of *anti-* governing a sb. Their origin is found in the mod. Eng. use of sbs. attributively, and the consequent combination of these with *anti-* in the same way as the adjectives to which they are equivalent; cf. the *episcopal* party, the *anti-episcopal* party, with the *church* party, the *anti-church* party. Thus they differ from the preceding group only in the absence of the adjective ending; and hence form the ordinary type, when the sb. has no appropriate derivative adj., as in most words of Teutonic and OFr. origin. But their widely extended modern use seems partly to be the result of an independent

analysis of the phrase: thus, *anti-combination* laws = laws *anti* (i.e. *against*) *combination*; cf. the similar attrib. use of Latin phrases, as in *ante-mortem* fame, *ex tempore* discourse, *pro formâ* resolution, *post mortem* examination, and even the native *after-dinner* speech, *down-river* steamer, *underground* railway, *across-country* road, *off-hand* reply, *out-of-doors* life. So, *anti-* may here be considered as a naturalized preposition, equivalent to *against*, and taking its place in attributive phrases, in which *against* is never used. These may be formed *ad libitum*; they seem to have begun *c* 1650 with the **anti-court** party (cf. the *court* party); and notable instances are **anti-combination** (laws), **anti-corn-law** (league), **anti-rent** (agitation), **anti-slavery** (society), **anti-state-church** (association), **anti-vaccination** (league). Later used in senses: (i) Against or opposed to, as ***anti-apartheid***, ***-art***, ***-betting***, ***-Blimp***, ***-business***, ***-bus(s)ing***, ***-dumping*** (see DUMP *v.*[1] 2 c), ***-Establishment***, ***-litter***, ***-noise***, ***-pollution***, ***-poverty***, ***-reform***, ***-scrape***, ***-segregation***, ***-sex***, ***-theft***, ***-treat***, ***-union*** (= opposed to union; opposed to trade-unionism), ***-war***.

Prob., like other terms of alchemy, a corruption of some Arabic word, refashioned so as to wear a Gr. or L. aspect —perhaps, as has been suggested, of the Arabic name *uthmud, othmod*, itself, latinized as *athimodium, atimodium, atimonium, antimonium.* The earlier form of the Arab. is *ithmid*, in which Littré suggests an adaptation (quasi *isthimmid*) of Gr. *στίμιδ-α* variant of *στίμμι*, whence also L. *stibium.* If this conjecture be substantiated, *antimonium* and *stibium* will be transformations of the same word. 'Popular etymology' has analyzed Fr. *antimoine* as *ἀντί* + *moine* against the monks ('monks'-bane'), and, as usual in such cases, supported the derivation by an idle tale (see Johnson), making the name originate (more than 400 years too late) with the chemist Basil Valentine, in end of 15th c.]

Symbol Sb (*Stibium*).

apperception (æpə'sɛpʃən). *Metaph.* [ad. F. *aperception* (mod.L. *apperceptiōn-em*, Leibnitz), f. *apercevoir*: see APPERCEIVE and -TION.]

1. The mind's perception of itself as a conscious agent; self-consciousness.

1753 CHAMBERS *Cycl. Supp.*, *Adperception* in the Leibnitzian style, denotes the act whereby the mind becomes conscious to itself of a perception. **1763** REID *Inquiry* II. xv. (1785) 220 By apperception he understands that degree of perception, which reflects, as it were, upon itself: by which we are conscious of our own existence, and conscious of our own perceptions. **1877** CAIRD *Philos. Kant* v. 79 The monad that has consciousness of itself..that has not only perception, but apperception.

2. Mental perception, recognition.

3. a. *Psychol.* The action or fact of becoming conscious by subsequent reflection of a perception already experienced; any act or process by which the mind unites and assimilates a particular idea (esp. one newly presented) to a larger set or mass of ideas (already possessed), so as to comprehend it as part of the whole: see quots.

1876 J. SULLY in *Mind* Jan. 36 The entrance of a presentation into the internal field of view is termed a Perception; its entrance into the point of view an Apperception. **1887** J. DEWEY *Psychol.* 89 Apperception is the relating activity which combines the various sensuous elements presented to the mind at one time into a whole, and which unites these wholes, recurring at successive times, into a continuous mental life, thereby making psychical life intelligent. **1893** C. DE GARMO et al. tr. *Lange's Apperception* (1896) 28 Apperception is the subsumption of a notion, usually newly given and more or less individual, under a predicate which is more complete..and..usually older and more familiar. Apperception does not always follow perception immediately, for years sometimes intervene between the learning of a fact and its comprehension. **1923** H. G. BAYNES tr. *Jung's Psychol. Types* xi. 524 Apperception is a psychic process by which a new content is articulated to similar already-existing contents in such a way as to be understood, apprehended, or clear.

b. *attrib.*, as ***apperception mass***, ***process***, ***product.*** (H. Steinthal (1871) used the expressions 'Massen Apperception' and 'Massen Apperceptions-Process'.)

1890 W. JAMES *Princ. Psychol.* II. xix. 109 An apperception-product arises: the knowledge of the perceived being as a horse. *Ibid.*, Apperception-processes can perfectly well occur in which the new observation transforms or enriches the apperceiving group of ideas. **1896** W. J. ECKOFF tr. *J. F. Herbart's ABC of Sense-Perception* 88 Conscience..we have seen to be a complex apperception mass aboriginally compounded of innumerable presentations. **1933** *Brit. Jrnl. Psychol.* July 24 Subjects having a marked perseveration of the ideas and 'apperception masses' previously stimulated would presumably be more likely..to overlook words wrongly spelt.

Hence **apper'ceptionism** *Psychol.*, the explanation and systematization of the process of apperception; **apper'ceptionist**, one who holds or affects the doctrine of apperceptionism; **apperceptio'nistic** *a.*, of, pertaining to, or characterized by apperceptionism.

F. STOUT in *Mind* XVI. 31 Apperceptive processes differ for the most part from those which result in the formation of a percept. *Ibid.* 37 An apperceptive system is, apart from fatigue, more prompt to apperceive the more recently it has been brought into play.

1892 *Monist* Jan. 306 Under normal conditions the necessary alternation of different apperceptive masses produces a corresponding variation in the conditions of belief. 1952 W. J. H. ‖**a priori** (eɪpraɪ'ɔəraɪ), *advb.* (and *adj.*) *phr.* [L. *ā* from, *priōri* what is before: cf. *a posteriori*.]

1. A phrase used to characterize reasoning or arguing from causes to effects, from abstract notions to their conditions or consequences, from propositions or assumed axioms (and not from experience); deductive; deductively.

1710 [See a posteriori 1]. **1771** Smeaton in *Phil. Trans.* LXI. 210 Nor can we *a priori* determine the value of any new instrument. **1834** [See a posteriori 1]. **1862** McCosh *Supernat.* II. i. §2. 132 Reason commands us, in matters of experience, to be guided by observational evidence, and not by *à priori* principles.

2. Hence *loosely*: Previous to any special examination, presumptively, in accordance with one's previous knowledge or prepossessions.

1834 *Penny Cycl.* II. 199/1 When a sentence begins with '*à priori* we should think, etc. etc.' [it] in most cases will be found to mean nothing more than an expression of the leaning which the speaker found his mind inclined to, when he had only heard the proposition, and before he had investigated it. **1882** Farrar *Early Chr.* I. 85 This, however, can have only been an *à priori* conjecture, and there is no evidence which can be adduced in its support.

3. By some metaphysicians used for: Prior to experience; innate in the mind.

1841 Sir W. Hamilton in *Reid's Wks.* 762/1 The term *a priori*, by the influence of Kant and his school, is now very generally employed to characterise those elements of knowledge which are not obtained *a posteriori*,—are not evolved out of experience as facticious generalizations; but which, as native to, are potentially in, the mind antecedent to the act of experience.
